## CUSTOMS AND OTHER GENERAL INFORMATION

**The campground is only a small portion of Wisteria's 620 acres.** Do not stray from the clearly marked campground areas shown on the maps. Other land areas are off-limits because they are private sites, have rugged terrain, or are part of the wildlife/nature preserve. Wisteria land has many cliffs, ravines, and other natural features that may be hazardous.

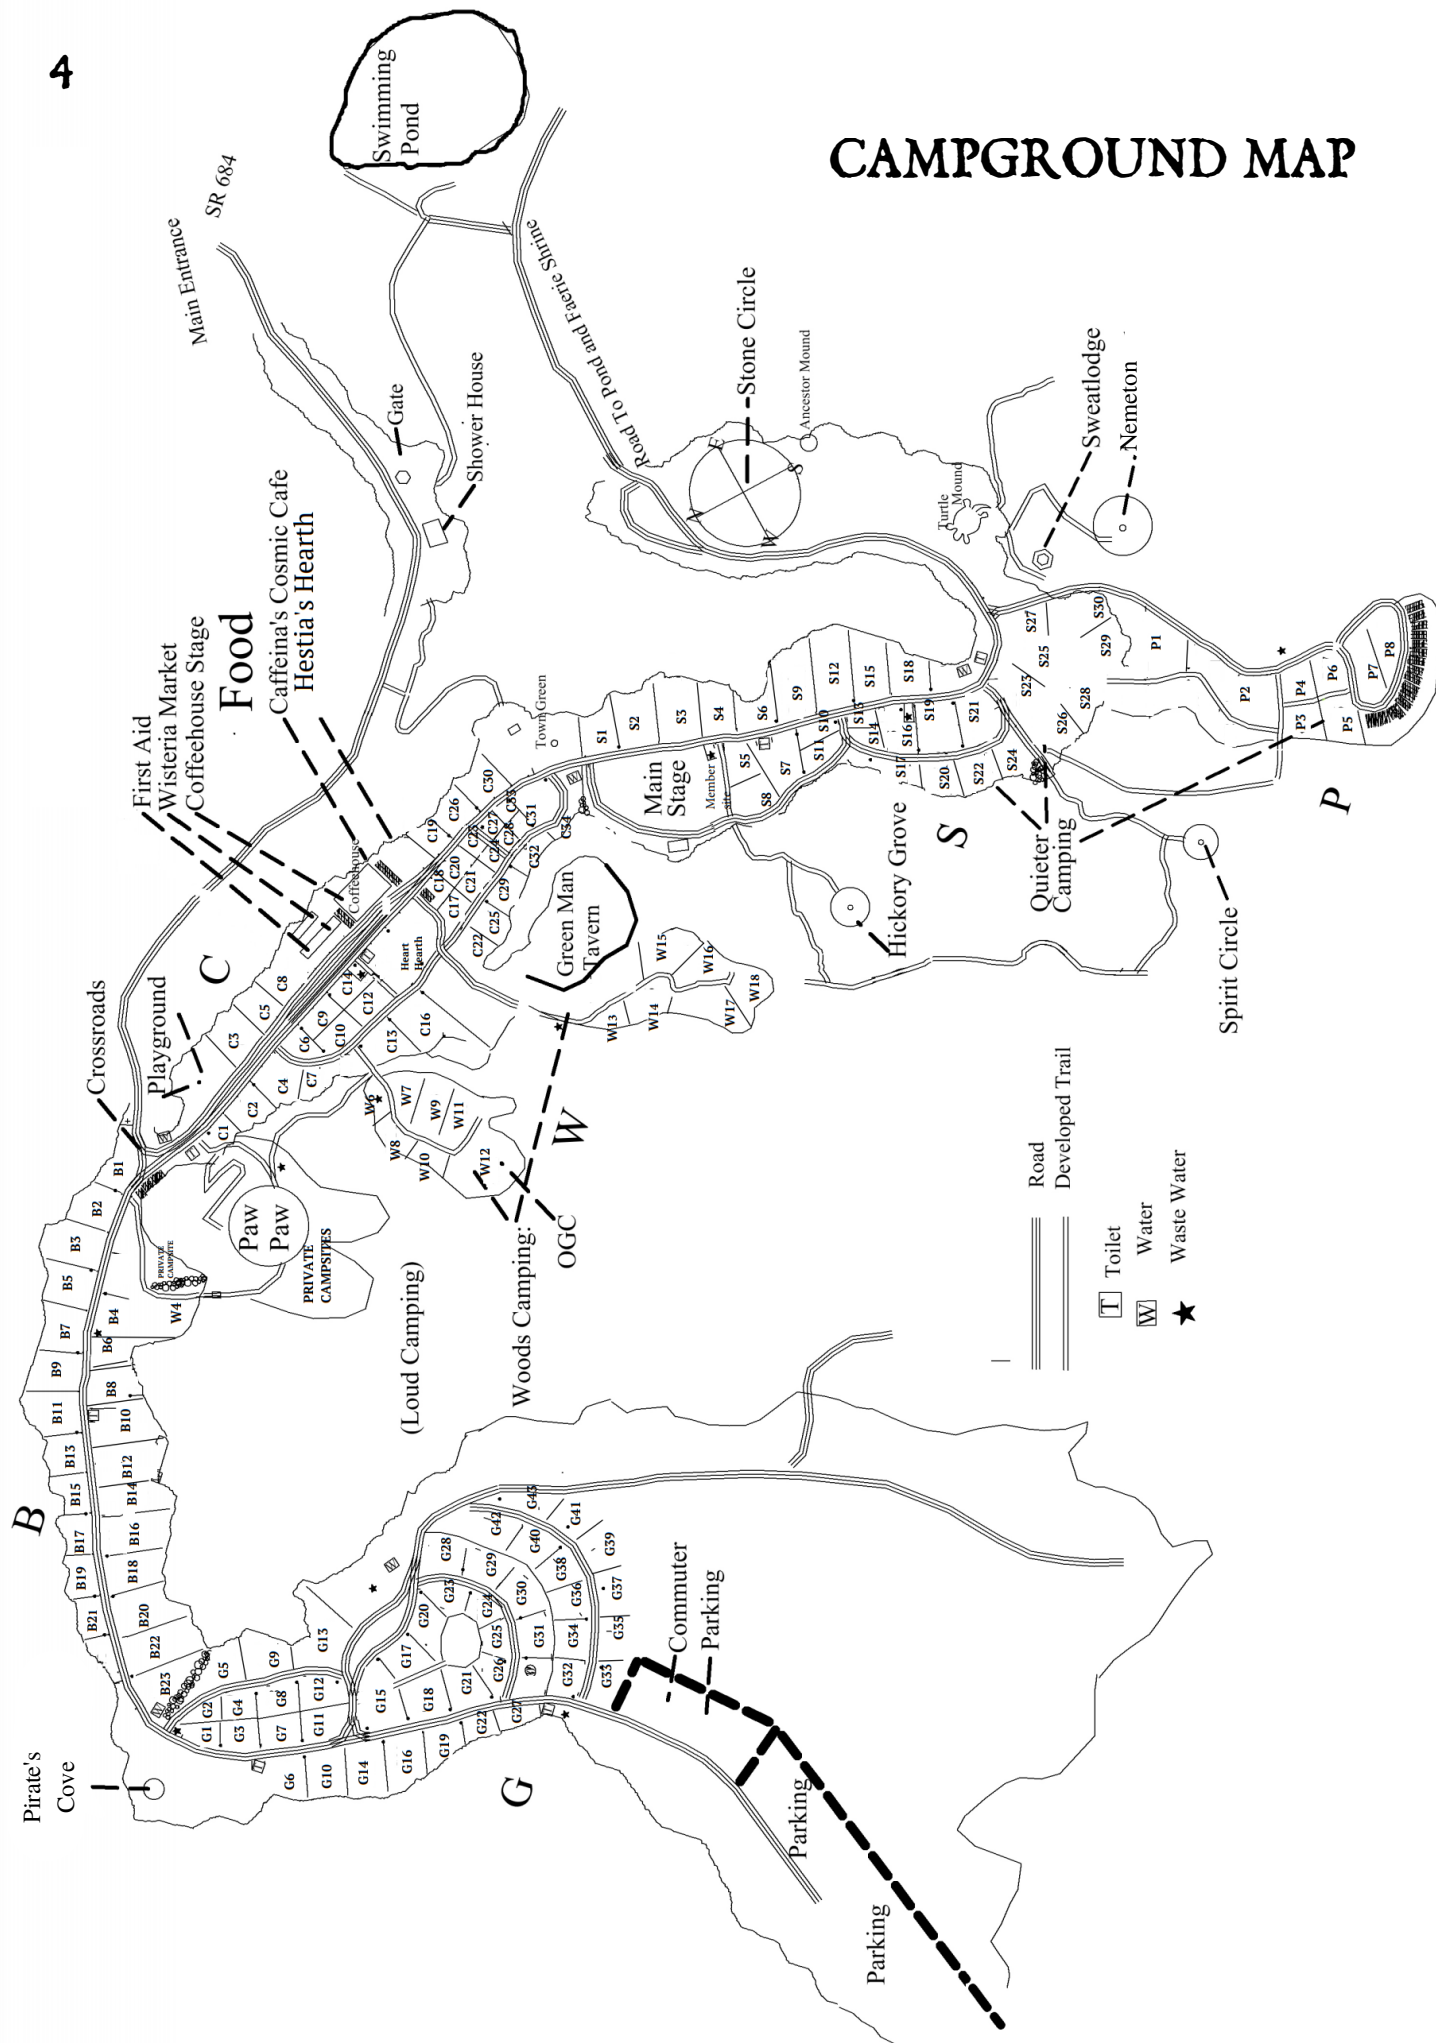

**Over 200 acres of Wisteria have been designated as a permanent nature preserve and sanctuary.** It encompasses many micro-environments from wetlands and woodlands to grassy fields and is a habitat for numerous species of plants and wildlife. Since the founding of Wisteria, this land has been left undisturbed, allowing reclaimed strip mine areas to heal as naturally as possible.

**Creatures great and small inhabit the land.** Insect repellent may be needed to repel mosquitoes. Check your body daily for ticks. Keep food stored securely with lids to discourage raccoons, ants, and other creatures from visiting your camp. Be cautious around wood piles and downed trees, as these may be habitats for wildlife. Please treat all local wildlife and insects with respect. If you are concerned about an encounter, contact a Wisteria staff member for assistance, so that no harm comes to campers or resident wildlife.

**To avoid infestation from invasive insects, do not bring in firewood from other areas.** No firewood is to be harvested from Wisteria forests, except for small dead twigs and branches. Do not dig fire pits. A limited number of community fire rings are available for sharing. Do not leave unattended fires burning (this includes lamps and candles). In wooded camping sections, use only established fire rings and circles. **No fires in the Pines area.** Should a fire get out of hand, immediately find a Wisteria staff member. Fire extinguishers are available throughout the campground. Keep water handy near fires. Please use caution when kindling fires of any size, and be careful with candles, torches, and cigarettes.

**FRS radios** are used by Wisteria staff. If your party uses these radios, please check with a staff member to ensure that you are not on the same frequencies.

Open to anyone, but **those who wish to participate in a sweatlodge must attend this orientation**. Number of participants, format for sweatlodge, and time to begin ceremony will be determined at the Orientation Workshop on the day of the ceremony.

The Sweatlodge Ceremony: The cycle of birth and death fuels the flame of life. Nature embodies a process of seeking stability and equilibrium – of maintaining balance. A strategy for existence in such a world is movement through the cycles, built upon the four quarters of the directions, the elements, the seasons – fundamental to traditional sweatlodges. The sweatlodge is a ceremony to ascertain balance through cleansing and renewal. A sweatlodge ceremony is shaped by both the past and the present. Your spiritual sincerity is the most important thing you can bring to a sweatlodge. No Drugs or Alcohol; just the 4 Elements – Earth, Air, Fire, & Water.

Join the Ohio Canid Center for a presentation on wild canids in North America featuring an animal ambassador!

## SCHEDULE

### Thursday, June 22nd

#### **4:00 pm: Compassionate Communication (NVC) with Shamanic Practices | Willow Wightman, Main Stage**

Compassionate or Nonviolent Communication (NVC) was developed by Marshall Rosenberg in the 1960s. It is a 4 part conversational model designed to support compassionate connection in order to collaborate in problem solving effectively in any given culture or relationship type. You can use this model to either give yourself empathy, listen to others empathetically, or express yourself honestly. Shamanism was originally practiced by medicine people across many tribes around the world. A shaman is someone who can equally work within the spirit realm and within our ordinary reality at the same time. They can communicate with all types of spirits and channel their healings and messages. They can also see patterns and symbols within this reality that have manifested from the spiritual realm. Shamans can provide healing and understanding that affects our spiritual, emotional, mental, and physical health. Above all else, shamans vow to never do harm. In order to do that, most of the time they are guided by ancestors, teachers, spirits, and allies from the spiritual realm in all of their practices.

In this Workshop, Willow will teach the basics of NVC with some shamanic practices to support integration and understanding. You will learn how to have greater empathy for yourself and others through identifying feelings and universal human needs. Then you will be guided through some drumming, guided meditations, and singing to fully embody your compassionate heart.

#### **4:00 pm: Bespoke Magic: Developing Your Personal Craft in One Year | Kalliope, Hickory Grove**

In this workshop, you'll be given a framework to build your own year of full and new moon rituals, tailored to improving one aspect of your spiritual practice. This moon esbat ritual series focuses on developing a single aspect (tarot, herbcraft, meditation, etc) of your spiritual skillset over the course of one year, ending the series with a strong, unique, personal practice in which you feel confident. Each ritual has two components: 1) a spiritual focus to develop your chosen practice and 2) a practical ritual skill, useful in the ritual at hand, but also more broadly applicable in ritual and spell crafting. Adding these techniques to your spellcrafting repertoire will provide you flexibility in creating or modifying spells and rituals to suit your individual needs - making bespoke magic! Examples for developing your tarot reading, meditation, and herbcraft will be included, but any practice (divination, astrology, crystal work, etc) may be applied; be creative and follow your intuition to adapt your work to your needs. Worksheets will be provided, but please bring your own journal and a pencil or pen. They'll be needed for the brainstorming session!

## Thursday, June 22nd

### **4:00 pm: Safe and Fun Foraging | *Meet at Heart Hearth***

We will be using plant identification apps as well as our own know-how to identify medicinal plants that happen to be growing around Wisteria! By studying these plants using modern technology, and taking the time to look up their lookalikes, we'll figure out what is safe or even helpful for various purposes - from eating to medicines to treating our bug bites. Parents are invited to bring their kids, because we will take home lots of helpful information about what's growing all around us! (For safety purposes, children will be required to avoid consuming plants from the workshop without parental consent.) Please remember to bring a reusable bag to carry back what you find, and come prepared to offroad a little! Good hiking shoes strongly recommended.

Here, we honor and give space to our Hearts and Spirits in Their truest forms - be they troubled or joyous, in pain or in love. Due to the potential nature of possible discussion topics, only individuals age 16+ may join. Parental discretion is advised. Any concerns or questions may be directed to the Circle Guide. Camp chairs or ground blankets recommended.

### **8:00 pm: Women's Circle: Feathers Forged in Fire | *Beth Zimmerman, Stone Circle***

Ladies of all shapes and sizes, we have each been formed from struggles, but also from beauty and celebration. It's time to recognize our inner excellence, celebrating all that makes us wonderful. Together, we will welcome the ancient goddesses, associated with fire, peacocks, darkness, and water. We will dance with them, sing to them, and invite them to remind us of our own beauty and strength.

### **8:00 pm: Colin Hill from Colin and the Crows | *Live Performance, Green Man Tavern***

Colin blends lyrics and poems with melodies pulled from the ether to create spellbinding songs. The natural flow of the songwriting process makes room for different genres to blend together. ## Friday, June 23rd

### **10:00 am: Creative Companions with MissGuided Painting | *Kim Keffer, Main Stage***

Artist Kim will guide participants in completing a painting while speaking of ways to awaken the creative spirit and silence the censor.

### **10:00 am: Pagans in Recovery: 12 Steps Without the God Part | *Appalachian Pagan Ministry, Hickory Grove***

It's a comment heard often in helping those with addictions: "I tried AA or NA, but I just couldn't get past the God part." The God part, of course, refers to the references to God and spirituality that appear in Alcoholics Anonymous literature – the 12 Steps and 12 Traditions in particular – as well as to the more overt signs of religion that can be part of some AA meetings, such as the reciting of the Lord's Prayer.

For the Heathen or Pagan, as well as with the agnostic, atheist and humanist, it can feel like a distraction from the work at hand as well as a disturbing admonishment to check their beliefs at the door. For others, however, tapping into God's power is the very thing that makes recovery possible. How, then, to ignore it? The conflicting mindsets have created tension over the years, a tension that AA/NA has sought to address by encouraging a personal definition of God as any higher power the person may choose. It could be, for example, nature, love, or the AA/NA group as a whole (in the latter case, as the explanation goes, G.O.D. becomes Group Of Drunks).

As part of her co-authoring of the book, "Steel Bars, Sacred Waters", Donna Donovan wrote a Celtic pagan version of the 12 Steps. This workshop focuses on the different versions of the 12 Steps that those who do not follow an Abrahamic path can utilize in their recovery. Despite any differences in beliefs, those in AA/NA are kindred spirits at heart, all struggling to subdue addiction's hold on their lives. And for that, support is essential. Rather than dispute which path is best, we're wise to remember the words of AA co-founder Wilson: "The roads to recovery are many."

Just like in Vegas, the same as in the rooms: what is said and shared at this workshop stays in this workshop.

Explore traditional mountain healing and the plentiful herbal pharmacopeia of the region with folklorist and witch Byron Ballard.

**2:30 pm: Osteomancy for Beginners | *River, Hickory Grove***

This workshop will explore the ancient practice of osteomancy, or bone-reading, as a divination tool. The bones are a collection of bones, stones, charms, and other items that can be 'cast' to divine the future, or as a psychic diagnostic tool to help discover points of interest or blockages in the energy body.

We will be introduced to the various types of bones, the different animal spirits that the bones represent, and the other pieces of a bone-throwing kit. We will learn how to interpret them for yourself or for a client or friend, and how to access your intuition so that your readings are accurate.

**2:30 pm: Djembe Fundamentals (Beginner/Intermediate) | *Karen Martin, Paw Paw***

This workshop will cover the fundamentals of djembe drumming, beginning with basic hand positions and sounds (bass, tone, slap) and moving on to foundational rhythms for beginners and intermediate players: heartbeat, 4/4 time (straight beat), 3/4 and 6/8 time (three-beats). Drum circle etiquette will also be touched upon, as well as suggestions for practice at home. We may also discuss and practice "drum talk" (soloing) if time allows. Ages 10+, please. Younger children may attend with a supervising parent.

Please bring your drum if you have one. Extra drums are also appreciated if you are willing to loan them to others for the workshop. Other percussion instruments (Dun-duns, conga, shakers, etc) and advanced players are welcome to participate! Your support is always appreciated.

**2:30 pm: Magical Herbs of Midsummer | *Dr. Jack Grey & Dr. Tom Sharp, Green Man Tavern***

Early herbalism was both medicinal and magical, and practitioners used the doctrine of signatures and planetary virtues to develop relationships with plants. In this workshop we will explore the natures and powers of the seven classical planets, as well as key aspects of magical herbalism. Focus will be given to the seven herbs classically associated with the Midsummer herb harvest, which will feature in the Main Ritual. Finally, we will hold a group discussion on how to apply these traditional beliefs and theories to modern practical magical herbalism.

## Friday, June 23rd

### **4:00 pm: Appalachian Cultures, A Primer | *Dr. Caleb Pendency, Pavilion***

Often called America's other, Appalachia is an American geographic region, culture, and heritage that much of the time is reduced to stereotypes of white rednecks, hillbillies, and the uneducated poor. This workshop challenges those narratives, expanding on the history of Appalachia to garner a deeper understanding of a place in the US that has contributed to the shaping of our nation and society. We will touch on Appalachian history, cultural practices, literature, art, folxways, and other ways of living in the mountains to gain more nuanced knowledge of what it means to be Appalachian.

### **4:00 pm: Chakra Balancing for Every Body and Soul | *Jenny Sieck, Hickory Grove***

I will lead the group through an introductory discussion of the strengths and growing edges of each chakra. I will lead them in toning each chakra and encourage them to drop down into a felt-sense space and notice which are speaking intuitively already, and which have shy energies, when they show up. I will discuss shifts and lifts, animal totems, source messages and clearing unwanted energies. I will then explain the affirmations that go with each chakra, or what I call, zipper songs, and show the group how to use these to amplify and raise energetic vibrations. As well as how to create zipper songs that are fine-tuned to your purpose. There will be a time for questions as well. I hope to create a fun, helpful and interactive experience.

### **4:00 pm: Appalachian Herbfest 2024 | *Nellie Werger, Main Stage***

Seleka combines meditation, mantra, and storytelling that invites self-discovery and emotive processing through a variety of sacred sounds, techniques and tones. This melodic journey includes elements of ancient flutes, drums, chimes, singing bowls, and vocals. Bring a nest of soft blankets and intentionally gift yourself some meaningful rest.

#### **2:30 pm: Stating the Obvious About Dosage: A Comedic Dialogue | *Beth Zimmerman, Pavilion***

Alcohol and drugs are such a taboo subject - yet they can be discussed the same way as any other holistic or medical product, with recommended guidelines - not just saying "stop that." I've studied them from a holistic viewpoint, as far as wellness studies and historical uses. I've also looked at them shamanically, as far as different tribes and peoples have accessed them - which luckily also involves modern studies! Medicinally, experts have analyzed and quantified aspects of how intoxicants affect the body, and it is amazing to learn about!

There are certain basic cautions that no one ever really wants to talk about, especially since it ends up sounding so...dull. Most people don't want to think so hard about substances designed to distract us - so we end up missing important details. I'm not here to endorse drinking - just to explain how it affects the body, in (hopefully) hilarious ways that allow us to better understand and sympathize with our poor meat suits, as they recover from the damage we put them through.

#### **2:30 pm: Brewing 101 | *Blacksmith, Green Man Tavern***

## PRESENTERS

### **Rayburn Buchanan**

My knowledge did not come from an academic background. For the last 2 years, I have spent every waking moment diving into the life of fungi by either personal cultivation... witnessing firsthand the attitude and ways of fungi, or reading and studying various recognized and sound sources.

My company, Idunn's Apples, main goal is to educate and promote the use of Fungi in every aspect of one's life to preserve our world and personal health. Now and mainly for our children. The DOA (Dept of Agriculture) has stated, and generously at that, that we with modern day techniques using all the cides (pesticides, fungicides, etc..) have 60, ONLY 60, more harvests until the dirt we've created absolutely gives out. So that is my main objective. To educate and help promote the healing of our Earth.

My husband and I met and he brought me to Athens after he went to Hocking College. I fell in love with the hills and sustainable and intentional communities here and I feel at home. I may still travel every summer but I want to grow old here. I also made my pet sitting gig into a full time job as Sunshine Pet Sitting and Training. That helps support me doing as much NVC and shamanic work as I can give. I love helping people one on one on their path with these two practices, as well as helping communities come together towards achieving their biggest dreams.
